Introverts Rule The World: How to Psychologically Convert from an Introvert to an Extrovert using Simple Techniques Right Now Personality has two general types: one is introvert, and the other is extrovert. Your mind has a lot to do with the type of personality you have. Through the power of your mind, you can choose your type of personality. It helps that you know what your personality type is, and one way to confirm is through the Myers-Briggs Type Indicator (MBTI). The MBTI is a psychological test to determine how you see the world and form your decisions. The test was originally intended for World War II women to increase their awareness of their personality preferences. This would, in turn, help them identify jobs where they think they can be most effective and comfortable. In the MBTI, introversion and extroversion are referred to as attitudes. Introverts are those who source their energy from their internal world. Theirs is a quiet world all by themselves, away from external activities. Extroverts, on the other hand, need their external world to rebuild their energy. They love to be with people and do their activities. Using the power of your mind, you can choose between the internal and external worlds. If you are one of the few who prefer your internal world, but needs to go outside and explore the external world, you can do so with simple mind techniques. This digital book aims to guide you through your journey from being an introvert to becoming more like an extrovert. This item ships from La Vergne, TN. Paperback.
