

The Enigma of Ferment: From the Philosopher's Stone to the First Biochemical Nobel Prize

By Ulf Lagerkvist

World Scientific Publishing Co Pte Ltd. Paperback. Condition: new. BRAND NEW, The Enigma of Ferment: From the Philosopher's Stone to the First Biochemical Nobel Prize, Ulf Lagerkvist, This popular account of the history of ferment takes the reader on a fascinating journey from its obscure origins in medieval medicine and alchemy to the modern concept of the enzyme. During the 19th century, the question of the nature of the ferment led to a long and bitter conflict between those that believed in a vital force peculiar to the living cell and those that looked for a more chemical explanation. The book takes an in-depth look at the events of 1897 when Eduard Buchner demonstrated that cell-free extracts of yeast could catalyze alcoholic fermentation, putting an end to "vitalism" and at the same time earning him a Nobel Prize, the first to be awarded for purely biochemical work.

Reviews

The ideal ebook i possibly study. Better then never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.
