Excerpt: . . . of these reservoir sites is 114, 000 acre-feet, or more than enough to regulate fully the flow of the stream. WATER POWERS. DEVELOPED WATER POWERS. RATED CAPACITY. Hydraulic power developments in the Yakima basin are unimportant when compared with the total water power developed in the State of Washington. The rated capacity of power machinery installed or in course of construction in the State in 1913 has been estimated at approximately 400, 000 horsepower. Of this amount about 190, 000 horsepower may be credited to the section. of the State west of the Cascade Range and about 170, 000 horsepower to the Spokane River developments. Only about 14, 000 horsepower, or 3. 5 per cent of the total in the State, is developed in the Yakima Valley. The following table, summarizing present developments in the basin, has been compiled from data furnished by the...
