Bloomsbury UK Apr 2016, 2016. Taschenbuch. Condition: Neu. Neuware - Flash crashes. Speed dating. Instant messaging. From the devices we carry to the lives we lead, everything is getting faster, faster. But where did this great acceleration come from And where will it lead In this vitally important new book, Robert Colvile explains how the cult of disruption in Silicon Valley, the ceaseless advance of technology and our own fundamental appetite for novelty and convenience have combined to speed up every aspect of daily life. Drawing on the latest research, this book traces the path of this acceleration through our working and social lives, the food we buy and the music to which we listen. It explains how it's transforming the media, politics and the financial markets - and asks whether our bodies, and the natural environment, can cope. As we race towards the future - into a world packed with new technologies, new ideas and new discoveries - this scintillating and engrossing book is an invaluable, must-read guide to the wonders and dangers that await us. 390 pp. Englisch.
