There has long appeared to me to be great want of a compendious work on the theory and solution of Equations in the English language; and the successful researches of Horner, Budan, Fourier, and Sturm, have now so entirely changed the state of this department of analysis, as to render such a publication almost indispensable. The improvements of Mr. Horner, which have so greatly contributed to perfect the numerical solution of equations of all orders, were first published in the Philosophical Transactions of the Royal Society, in the year 1819; but strange as it may appear, have as yet excited but little attention from British mathematicians.
